Summary

Full-stack developer specializing in React, Next.js, Express, and MongoDB. Passionate about building high-performance apps, solving algorithmic problems (1000+ LeetCode), and crafting beautiful interfaces with animation libraries. Experienced with cloud platforms, Redis caching, and real-time systems.

Skills

Languages: JavaScript, TypeScript, Java
Frameworks: React, Next.js, Express.js, Tailwind CSS, Node.js
Tools/DevOps: Git, Docker, AWS, Redis, MongoDB, Linux
Others: REST API, OAuth, JWT, Agile/Scrum

Experience

- Developed and maintained scalable full-stack applications using Next.js and Express.

- Reduced API response times by 40% with Redis caching and database optimization.

- Integrated WhatsApp API for customer communication, increasing retention by 25%.

- Built custom web applications and portfolios for clients using React, Tailwind, and Firebase.

- Deployed and maintained projects on Vercel and AWS.

Projects

My Own Facebook — GitHub
A fully functional social media app with authentication, real-time chat, posts, and notifications.
Portfolio Website — GitHub
3D animated portfolio built with Next.js, Three.js, and Framer Motion.
iNews App — GitHub
News app with infinite scroll and category filter using NewsAPI and React.
Component Lab — GitHub
Custom reusable component library using HeroUI, Tailwind, and Framer Motion.

Achievements

- Solved 1000+ problems on LeetCode

- Achieved top 10% in Biweekly LeetCode Contests

- Built a JSX parser from scratch for dynamic rendering in Next.js

Education

Bachelor of Arts (B.A)
Jatindra Rajendra Mahavidyalaya   *Expected Graduation: 2025*
